BORN TO BE READY

“ Through our complete and integrated solutions for Home & Building Management, with 30 years in industry experience worldwide, by providing our Clients with a consistent and efficient service, assuring quality and design, typical features of the “Made in Italy” legacy, and competitiveness in prices. ”

Master Divisione Elettrica was founded in 1982 and quickly became one of the main manufacturers of electrical equipment in the Italian market.

Through research and development, our product range had strengthened, bringing the company into the international limelight with our innovations.

In 2009 Master introduced UNA, a innovative concept of smart-home system revolutionizing the traditional idea of home automation.

With international branches and partners, the Master products now reach several countries, meeting the needs of different markets.

Master Divisione Elettrica is committed to quality and proud to bring its Made in Italy products to the rest of the world.
