MIX MO
SIM PLI CITY

MIXMO contains 30 years of Master's experience in a easy-to-install accessory, and a elegant device to use. MIXMO includes more than 50 different devices and it is available in white or ivory colour. MIXMO can be installed on round boxes, it's provided with new generation special clips for perfect fixing. MIXMO is international, since its range of sockets includes the most used international standars. MIXMO can wear the color you prefer: choose among 12 different colours to create different combinations to match with all rooms.
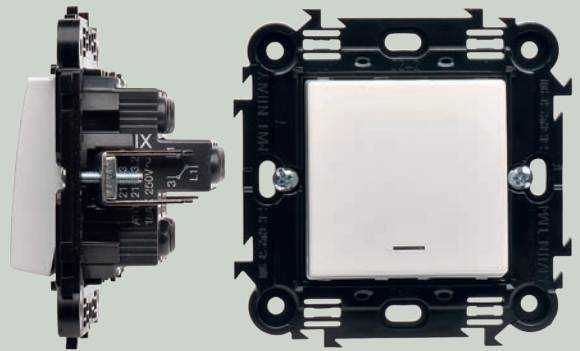

MIXMO has been designed to make the seller's and the installer's jobs easier.

" **Through our complete and integrated solutions for Home & Building Management, with 30 years in industry experience worldwide, by providing our Clients with a consistent and efficient service, assuring quality and design, typical features of the "Made in Italy" legacy, and competitiveness in prices. "**

Master Divisione Elettrica was founded in 1982 and quickly became one of the main manufacturers of electrical equipment in the Italian market.

Through research and development, our product range had strenghtened, bringing the company into the international limelight with our innovations.

In 2009 Master introduced UNA, a innovative concept of smart-home system revolutionizing the traditional idea of home automation.

With international branches and partners, the Master products now reach several countries, meeting the needs of different markets.

Master Divisione Elettrica is committed to quality and proud to bring its Made in Italy products to the rest of the world.
