Start thinking about tomorrow

35 years together

Since 1982, Master has embodied the best traditions of Italian creativity by bringing the art, style and originality, that have always made Italy stand out from the rest of the world, into products aimed to simplify the lives of those who choose them. Thirty five years of worldwide experience in providing electrical solutions for the residential, industrial and tertiary settings allow Master to easily cope with the differing needs of differing countries and their various installation standards.

Constant attention to human well-being, to technical evolution and to the intelligent management of energy make Master the ideal partner for those who opt to work every day with an eye on tomorrow.

IN
ITALY

ITALY MEANS HISTORY

From the times of the ancient Romans to the birth of the European Union from Venice, the Queen of the Mediterranean, to Florence, the cradle of the Renaissance, Italy has been the lifeblood of culture and world history for thousands of years.

ITALY MEANS INNOVATION

From Galileo Galilei's telescope to the inventions of Leonardo da Vinci, from Guglielmo Marconi's radio to Alessandro Volta's battery, Italy's great innovative capacity continues today with the best industries in the world in the car, fashion, aerospace, energy and telecommunications sectors.

ITALY MEANS ART

The great artistic tradition of Dante Alighieri and Michelangelo, Giuseppe Verdi and Federico Fellini lives again every day in the works of great artists, architects, musicians, chefs, film directors and stylists who spread the sheer delight and elegance of Italian style the whole world over.

MADE IN ITALY

This is why every single product that is conceived, designed and created in Italy contains a piece of our history, of our art and of our great capacity to innovate and make us proud to offer everyone the beauty of our country day after day.

British Standard

loves Italian technology

When the vast experience of Master meets the unique needs of any particular country, the technical innovation that has always been one of its greatest strengths, sets it apart from the rest.

The new BS System by Master encompasses all the experience and technology which Master has gained and developed over the years, revealed in simple and sharp lines with an always up-to-date design decorated with two different plate finishes in either metal, glass or plastic.

The high quality and ease of installation which have always been the hallmark of Master products have now arrived on British standard markets to offer a great new experience in true Italian style.

MIX PLATES

With their sharp but essential design, these plates and their simple yet influential shapes sit perfectly in even the most complex of settings.

VITRA PLATES

The solidity and strength of metal and the pure elegance of glass blend with simple yet sophisticated design to create a series of superb plates.

light up your design

CUSTOMIZE THE COLOURS

The BS System also can be customized for specific project requirements. Three elegant options to create perfect combinations with MIX and VITRA frames in bronze, silver and gold colors or to create endless combinations with VITRA and MIX frames.
